26. Overview of the entity's material responsible business conduct issues

Please indicate material responsible business conduct and sustainability issues pertaining to environmental and social matters that present a risk or an opportunity to your business, rationale for identifying the same, approach to adapt or mitigate the risk along-with its financial implications, as per the following format.

Sl. No.	Material issue identified	Indicate whether risk or opportunity (R/O)	Rationale for identifying the risk/opportunity	In case of risk, approach to adapt or mitigate	Financial implications of the risk or opportunity (Indicate positive or negative implications)
1.	Product Quality.	Risk and Opportunity	Risk: Our customers expect us to maintain and continuously improve the quality of our products. Any lapse in product quality would negatively impact our brand value and market share. Opportunity: Upholding and improving our product quality will enable us to expand our market share and retain our existing customer base. Furthermore, the increasing use of paper products in the food industry presents a significant emerging opportunity.	Continuous monitoring and improvement of product quality are required to ensure our products maintain a consistent standard and meet customer expectations.	Positive: Maintaining product quality ensures that we remain competitive in our industry
2	Raw Material: Wood Availability	Risk	Risk: Wood is the primary raw material used in pulp manufacturing. However, securing a sustained supply of high-quality wood remains a critical challenge.	The Company has a well-defined agro forestry and farm forestry promotion program developed by the plantation team. To ensure the availability of high-quality wood, the team introduces site-specific clones tailored to prevailing soil and climatic conditions. Furthermore, the company actively motivates farmers to cultivate pulpwood plantations by establishing demonstration plots across various regions. Partner nurseries have been developed to provide beneficiaries with timely access to quality planting materials. Diversifying raw materials by evaluating and integrating new wood species into the pulping process. Expanding geographic sourcing through inter-state procurement and promoting farm forestry in neighbouring states. Supplementing fibre supply through the import of wood chips to optimize resource mix.	Negative: Shortage of wood may lead to high cost of sourcing of wood

Sl. No.	Material issue identified	Indicate whether risk or opportunity (R/O)	Rationale for identifying the risk/opportunity	In case of risk, approach to adapt or mitigate	Financial implications of the risk or opportunity (Indicate positive or negative implications)
3	Energy Management	Risk and Opportunity	Risk: With increasing scarcity of natural resources and increasing cost, efficient management of energy becomes critical for uninterrupted business operations. Opportunity: Improving production process for better management of energy would not only enable us to improve operating margin but also it would enable us to reduce carbon footprint.	Our company continuously optimizes production processes and adopts energy-efficient equipment to minimize environmental impact. These ongoing improvements successfully saved 78,148 GJ of energy during the 2025–26 financial year.	Negative: Increases the cost of production and may not meet target set by BEE requirement.
4	Human Rights Practices	Risk and Opportunity	Risk: Absence of a comprehensive Human Rights governance structure encompassing parameters such as working conditions, child/ forced labour, fair remuneration, gender diversity, prevention of sexual harassment, freedom of association and collective bargaining will adversely impact the Company's smooth working & people development. Opportunity: This will help the Company to create better working environment, with involvement and ownership of people working in Company.	The Company has in place policy on Prevention of Sexual Harassment in line with the requirements of The Sexual Harassment of Women at the Workplace (Prevention, Prohibition and Redressal) Act, 2013. All employees (permanent, contractual, temporary and trainees) are covered under this policy. Further we also have policy on Freedom of association and collective bargaining, Forced and Compulsory Labour, Prohibiting Child Labour, Discrimination in Employment & Occupation and Equal Opportunity. During the financial year 2025-26 no complaints regarding child labour, forced labour, involuntary labour, sexual harassment were received by the Company. The Company has Joint Negotiating committee represented by workmen to deal with employees related issues and Long-Term Wage Settlement is signed periodically.	Positive: An optimized work environment enhances operational efficiency, resulting in cost-effective and high-quality product manufacturing.

Sl. No.	Material issue identified	Indicate whether risk or opportunity (R/O)	Rationale for identifying the risk/opportunity	In case of risk, approach to adapt or mitigate	Financial implications of the risk or opportunity (Indicate positive or negative implications)
5	Environment Management	Risk	Risk: As Water is a critical operational input, we have to strictly monitor our processes to ensure full compliance with all regulatory standards for air emissions, water consumption, and effluent discharge.	Water remains a material focus area for our manufacturing operations. Through continuous process optimizations, the company achieved a 6.50% reduction in specific water consumption during FY 2025–26 compared to FY 2024–25. Grounded in the 3R (Reduce, Reuse, Recycle) principle, we are actively expanding the utilization of recycled water across our operations. To ensure absolute statutory compliance, the company has deployed advanced technology, upgraded equipment, and established Continuous Emission Monitoring Systems (CEMS) and online effluent monitoring systems to track air emissions and water parameters in real time.	Negative: Non-Compliance of norms may lead to closure of plant.
6	Coal - Availability	Risk and Opportunity	Risk: Availability of local coal is limited. Cost of sourcing imported coal is high. Opportunity: To look for opportunity to reduce energy (Steam & Power) consumption to reduce cost. Also look for non-fossil fuel energy sources.	Through regular technical energy audits, the company actively modernizes its operations by replacing inefficient legacy assets with energy-efficient equipment & technology to reduce our total carbon footprint.	Negative: Increase in energy cost due to use of high cost imported coal.
